

PROFESSIONAL AV INSTALLATION & MAINTENANCE

MAINTENANCE

Following the successful installation of your Audio Visual System, Digisound Audio Visual will be there for you to ensure that your equipment is fully maintained regardless of any issue that may arise. As every customer has different skill-sets and different needs, we can tailor our maintenance contracts to fit your organization.

CONTRACT MAINTENANCE

Whilst all our Installed Equipment is covered by our standard 12month warranty, we obviously have many installations that have been in place longer than this. For installations over 12 months old, we offer a very cost effective maintenance contract. Typically our maintenance contracts cover a preventative maintenance plan as well as emergency repair plans and temporary replacement equipment. Cost effectiveness and flexibility are our main aims and to achieve this, we construct every maintenance contract to each client's individual needs. We will even cover equipment that was not supplied or installed by Digisound Audio Visual.

Typical Professional Roll over Maintenance Contract:

- Pre-paid annual maintenance
- On site Technician next business day
- Bi -Annual proactive maintenance call outs
- Replacement equipment next business day
- Discounted consumables
- Complete piece of mind

Annual packages from €2 per day
